

Capacity Building Committee

Work stream in support of SAI PMF

The SAI Performance Measurement Framework is an international framework for self, peer, or external assessments of a SAI's performance against the International Standards of Supreme Audit Institutions (ISSAIs) and other established international good practices, thereby enabling the SAI to confidently engage internally and externally regarding its future.

Areas of responsibility

The SAI PMF has been developed under the auspices of the INTOSAI Working Group on the Value and Benefits of SAIs, with valuable support from the INTOSAI-Donor Cooperation, to be implemented under INTOSAI ownership in collaboration with the donor community.

The INTOSAI Capacity Building Committee is the designated strategic governance lead for the SAI PMF and IDI the operational lead post 2016 in order to ensure INTOSAI ownership of the SAI PMF and its implementation.

Future activities

A SAI PMF strategy has been drafted to guide the global roll out of SAI PMF after its endorsement by INCOSAI 2016, with the purpose of achieving sustainable improvement in SAI performance globally, through use of SAI PMF.

A single, globally recognized and broadly used needs assessment and performance measurement tool will enhance the value and contribution of SAIs across the world. It will also enable monitoring of SAI performance progress globally and regionally over time, thereby providing input to regional and global capacity development programs.

To achieve this purpose, the following two strategic outcomes have been identified.

1. To establish the SAI PMF as a widely recognized tool within INTOSAI for holistic, evidence-based SAI performance measurement, and recognized as such by in-country stakeholders and the donor community.
2. Through an effective roll-out of the SAI PMF, with proper guidance and support-activities, ensuring that all assessments are considered to be of high quality, credible and relevant by all users.

A SAI PMF Independent Advisory Group will be established to support the CBC and IDI in their efforts to continually develop and implement SAI PMF, comprising of volunteer representatives from INTOSAI, the donor community, and potentially other stakeholders.

The implementation of the SAI PMF will be supported by a communication strategy, and the CBC will establish a platform for communication on strategic SAI PMF matters such as for example:

- The continued relevance of the SAI PMF
- Quality of SAI PMF assessments
- Cooperation with regional organizations regarding regional strategies and programs for effective SAI PMF implementation
- Promotion and championing of SAI PMF to relevant regional and global stakeholders

The CBC will monitor the implementation of the SAI PMF and also take responsibility for overseeing evaluations of the implementation and use of the SAI PMF.
